

Our laboratory testing is a free service. In order to keep it that way, we ask you to limit the samples you send to a maximum of four packs per time. Note: the best annealing results are achieved with high quality brass. Please do not send brass you already know is low quality. Annealing won't change that. Please don't send "range" brass. It was left there for a reason. We welcome wildcats. We also encourage shooters to send brass for confirmation of program settings even if it is already listed. There can occasionally be subtle variations lot to lot, and also in measuring neck wall thicknesses.

Send to: AMP Annealing Ltd. PO Box 72 Bombay Auckland 2343 New Zealand. Note: for USA customers, we have found US Post to be the most economical and prompt.

<p>Contributor's name.....          Email.....          Cartridge name (i.e. 308 Win.).....          Case brand.....Lot# (if known).....          Times shot (approx.).....          Comments (neck turned etc.).....          Note: please supply six <b>used, resized, de-primed cases</b>. The neck must be <b>bright and shiny</b> for microscopic analysis.  <b>Do not</b> use steel wool on the necks.          Include this coupon in each zip lock bag. One case type per bag.</p>	<p>Contributor's name.....          Email.....          Cartridge name (i.e. 308 Win.).....          Case brand.....Lot# (if known).....
